                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    A; -I - FUNCTION: INHIBITS DAM BINDING OF TCF3 (E47) HOMODIMERS AND TCF3

-I - FUNCTION: INHIBITS DAM BINDING OF TCF3 (E47) HOMODIMERS AND TCF3

(E47) / NEURODI HETERODIMERS AND ACTS AS A STRONG REPRESSOR OF

NEURODI AND MYOD-RESPONSIVE GENES, PROBABLY BY HETERODIMERIZATION

WITH CLASS A BASIC HELIX-LOOP-HELIX FACTORS. DESPITE THE PRESENCE

OF AN INTACT BASIC DOMAIN, DOES NOT BIND TO DNA.

-I - SUBGNIT: HETERODIMER WITH OTHER BILL PROTEINS, LIKE TCF3 (E47).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        BĀSIC DOMAIN.
